16. pan
18. end
20. red

ANSWER to problem from page 11

Place 3 marbles on one side and 3 on the other side of the balancing scale. If one side goes down, you now know it is one of these 3 marbles and you still have one chance left at the balancing scale.

From these 3 marbles, take any 2 and balance them. The heavier one should be obvious. If they should balance, then the one you left off must be the heavier marble.

It is possible that when you placed the original 6 marbles on the scale (3 on one side and 3 on the other) that they would balance. If they do, use your remaining one chance at the scale to balance the 2 marbles that you left off. The heavier marble should be obvious.

ANSWER to MAGIC SQUARES from page 9

8	1	6
3	5	7
4	9	2

6	1	8
7	5	3
2	9	4

CHECK YES IF THE SENTENCE HAS A NAME OF A STATE HIDDEN WITHIN IT.

1. Yes ☒ No ☐

Use different crayons to color a donut
COLORADO

2. Yes ☐ No ☐

Was the model aware that she would not be paid for her work?

3. Yes ☐ No ☐

Bring the dog to the picnic.

4. Yes ☐ No ☐

Car washing tonight will save time in the morning.

5. Yes ☐ No ☐

Using a frisbie at the beach, can be a lot of fun.

6. Yes ☐ No ☐

Use the main entrance to get into the house.

WORD PUZZLE

Can you find the ten names of fairy tale characters listed below? Remember the names can go left or right, up or down, or even diagonally. The first two are done for you so you can see how this works.

- ✓ 1. Cinderella
- ✓ 2. Gretel
- 3. Tinkerbell
- 4. Thumbelina
- 5. Rumpelstiltskin
- 6. Sneezy
- 7. Alice
- 8. Peter Pan
- 9. Rapunzel
- 10. Wendy

PROGRESSIVE WORDS

By changing one letter at a time, can you change the top word in the boxes into the bottom word? Each row must be a new word that you know. For example, here is how MAKE can be changed into DATE.

M	A	K	E
R	A	K	E
R	A	T	E
D	A	T	E

Now try these on your own. If you have trouble, the answers are on page 14.

#1.

D	I	M	E
S	A	L	E

#2.

M	A	L	T
S	A	M	E

#3.

J	O	K	E
S	O	L	E

A DIFFICULT PROBLEM OF WEIGHT

Pretend that you have a balancing scale, 8 marbles (that look exactly the same) but you are told that one marble is heavier than the rest.

Using the balancing scale, with only two chances at the scale, can you find the heavier marble.

Try to work this problem out by yourself. The answer is on page 13 in case you cannot do it.

MIND READING TRICK

Ask a friend to choose any number from 1 to 50. Now tell him to write it down and put a circle around it.

Now tell him to add 4
then add 7
then take away 2
then add 3

Now tell him to take away his original number (the one with the circle around it).

now tell him to add 4
times by 2
take away 3

HIS ANSWER WILL ALWAYS BE 29

How this is done. Since you tell your friend to take away his original number the answer will always be 29. Try it with any original number, the answer will always be 29.

Can you connect all nine dots with 4 straight lines without lifting your pencil off the paper?

If you can't, the robot will give you a hint and tell you where you can find the correct answer.

THERE ARE NO WINDOWS OR DOORS

HOW DOES THE MAN GET OUT OF THIS ROOM? THE ROBOT WILL TELL YOU.

MAGIC SQUARES

MAGIC SQUARE
